Situation Overview

- **California State of Emergency Proclamation**

On March 4, 2020, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the State prepare for broader spread of COVID-19.

- **Global Health Advisory**

On August 6, 2020, in close coordination with the U.S. Centers for Disease Control and Prevention (CDC), the Department of State lifted the Global Level 4 Health Advisory. The Global Advisory, initially put in place on March 19, 2020, advised U.S. citizens to avoid all international travel due to the global impact of COVID-19. For more information visit: <https://www.state.gov>.

- **Executive Order N-33-20**

On August 28, 2020, California introduced a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities by counties. Visit [Blueprint for a Safer Economy](#) for more information and to check the status of a county. This blueprint included a health equity metric to be used along with other metrics to determine a county's tier. The purpose of [Equity Metric](#) is to ensure California reopens its economy safely by reducing disease transmission in all communities.

- **FEMA-4482-DR-CA**

On March 22, 2020, President Trump approved Major Declaration FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

Early December Public Safety Power Shutoff ([Final Report](#))

December 9, 2020 – 1630 Hours

Report No. 10

Incident Summary

A significant dry wind event will bring high risk fire conditions to portions of Coastal, Inland, and Southern Regions. Southern California Edison, San Diego Gas and Electric, and Pacific Gas and Electric have activated PSPS protocols due to elevated fire conditions.

Situation Cell Overview

Elevated to locally critical fire weather conditions persist statewide. Winds will increase across Southern California in the mountains and deserts Thursday night into Friday morning. Southern California Edison (SCE) and San Diego Gas and Electric (SDG&E) have activated public safety power shutoff protocols to mitigate the risks of large fires.

Key Points

- SCE is currently at All PSPS Lines Re-energized PPS Stage for SCE PPS Event 12.04.20.
- SCE is currently at Activating PPS Protocols/Potential to De-energize PPS Stage for SCE PPS Event 12.04.20 B (12.10.20-12.11.20).
- SDG&E is currently at All PPS Lines Re-energized PPS Stage.
- Pacific Gas and Electric (PG&E) has deactivated their EOC as they no longer see a risk in the 12/9/20 potential weather event.
- PG&E cancelled the 12.07.20 PPS event without de-energizing any customers.
- Critical fire weather conditions could lead to rapid spread of any new fires.
- Several new fires have started in the Southern Region.
- This will be the final Situation Cell Incident Report for the Early December Public Safety Power Shutoff. For updates on SCE PPS Event 12.04.20 B (12.10.20-12.11.20), please see the Cal OES Daily Situation Report and official PPS Form Notifications.

Potential Impacts

- High winds in combination with dry surface fuels bring critical fire weather conditions.

Weather

Northern California Geographical Coordination Center (Northern GACC):

Continued dry conditions today with north to northeast winds increasing along northwest mountain ridges, northern and western portions of the Sacramento Valley, and along the west slopes of the Cascade Sierra Ranges this afternoon and evening. Peak gusts will generally be 20-30 mph but locally up to 45 mph in the most exposed locations. Winds will gradually be diminishing late tonight through Thursday morning. There will be dry northwest winds increasing to 25-40 mph midday Thursday through Thursday afternoon ahead of an approaching trough. The strongest winds and the lowest relative humidity is favoring the downslope areas of the eastern Coastal Mountains, western Sacramento Valley, and Greater Bay Area. Minimum relative humidity locally may drop into the teens in windy downslope areas.

Southern California Geographical Coordination Center (Southern GACC):

The potential for large fires will be slightly elevated across Southern California today due to locally gusty winds combined with warm temperatures and very dry conditions. The large fire threat will become low across the entire region Thursday through early next week as temperatures cool and minimum humidity increases to above 15%. Westerly winds of 20-30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes Thursday afternoon into Friday morning. Northerly nighttime winds over Santa Barbara County and the Grapevine are not expected to be a large fire concern since they will be accompanied by high humidity. The dead fuel moisture will remain extremely dry today and then it will slowly increase through early next week. There will be little change to the very low live fuel moisture through early next week. Expect light initial attack activity across the region through early next week.

Santa Ana Wildfire Threat Index

Local northeast to east winds 10 to 20 mph with gusts to 35 mph will surface across the mountains and below the canyons and passes this morning. Humidity will be in the single digits and teens all day long. Maximum temperatures will be 5 to 10 degrees above normal, with 70s across the lower elevations. Both the dead and live fuels will be extremely dry.

Zone 1: LA-Ventura						
Zone 2: Orange-Inland Empire						
Zone 3: San Diego						
Zone 4: Santa Barbara						

NO RATING	Winds are either not expected, will not contribute to significant fire activity.
MARGINAL	Upon Ignition, fires may grow rapidly.
MODERATE	Upon Ignition, fires will grow rapidly and will be difficult to control.
HIGH	Upon Ignition, fires will grow very rapidly, will burn intensely, and will be very difficult to control.
EXTREME	Upon Ignition, fires will have extreme growth, will burn very intensely, and will be uncontrollable.

National Weather Service (NWS)

- Elevated to locally critical fire weather conditions persist statewide.
- Dry weather will continue other than a few light showers possible in Northern California.
- Periods of gusty winds are likely as a couple of dry storm systems move through the area.
 - North-northwest winds will increase across the Bay Area on Thursday afternoon, gusting 25 to 45 mph.
 - West-northwest winds will increase across Southern California in the mountains and deserts Thursday night into Friday morning with the stronger gusts in the windier locations around 55 mph.
